PADCO

Multi-Clean

Maintenance program for hard surfaces sealed with *Multi-Clean Multi-Matte* sealer

Daily program

Always remove spills when they happen.

Door entrances should have carpets in place to stop the dirt coming in.

Soils to be removed daily with a dust sweeper.

When using vacuum make sure the base plate is plastic NOT metal.

Weekly program

Scrub floors with an auto scrubber using a 'white' or 'champagne' pad or clean using a mop and bucket.

Use Multi-Clean **Tough Green**, our 'green' cleaner, in your auto scrubber or mop application for daily cleaning.

Monthly program

After the floor has been cleaned and is dry;

Spray buff with Multi-Clean RSB Restorer to remove scratches when they occur, using a high speed burnisher with a champagne pad or an ultra high speed blue pad.

The Multi-Clean RSB Restorer is diluted with 70% water and used as a spray buff to rejuvenate the floor and remove small scratches.

The floor should be recoated in high traffic areas as and when required.

A good maintenance program will save you stripping and resealing the floor.

DO NOT clean with CITRUS, AMMONIA, PEROXIDE, CHLORINE or ACID based cleaners. Do NOT use an auto scrubber fitted with a tynex brush.
